Functional Programming with Scala

Project Title: Scala Project

Group Name: Group 11

d'AMERVAL, Léo

IG5_Polytech

November 19, 2024

- **Your Specific Contribution:**
  - Creating the relationship between MongoDB Atlas and Neo4j

- **Methodology or Approach:**
  - Creating a scala program that setup up all the endpoints (Atlas and Neo4j)
  - Fetching the data (json collection) from Atlas
  - Transform (with cypher queries)
  - Pushing data into Neo4j

Challenges and Learning

- **Challenges Faced and Their Resolutions:**
  - To face all the Atlas connections problems and fetch the data from it
  - Assemble every part of the project

- **Learning Gained:**
  - Have everything setup before the project start

- **Future Improvements:**
  - I should improve in being better
